

Newmedica Bristol Invitation to our CPD meeting covering: Macular OCT interpretation and management, a 3-point interactive CPD event for Optometrists – Thursday 6th June 2024.

To be held at:

Newmedica Bristol,
Building 720, Waterside Drive,
Aztec West,
Bristol,
BA32 4UD.

This discussion workshop considers three optical coherence tomography (OCT) cases which require a systematic approach to interpreting the images and clinical decision making. The cases consider the diagnosis of commonly occurring findings and their severity in order to support robust referral decisions.

The workshop will take you through patient case histories to help you understand how to interpret OCT scans, explaining what features to look for in each disease and how those relate to the specific retinal pathology seen. Tying together the presenting signs and symptoms, OCT interpretation and management including referral also play major roles in the discussion.

Timings:

18:30 – The doors will open for registration, welcome, drinks, buffet, and a tour of the new Surgical Centre.

19:00 – The event commences with an introduction to Newmedica Bristol led by Joel Seith, Head of Business Operations, followed by the CPD session presented by Consultant Ophthalmologist and Clinical Partner, Mr Johannes Keller & Jeenal Shah, Optometrist & Head of Clinical Services.

21:00 – The event will conclude.

Seats are limited so register your place promptly [HERE](#)
